

Vital for Veterans

SENIOR MANAGEMENT WINTER REVIEW

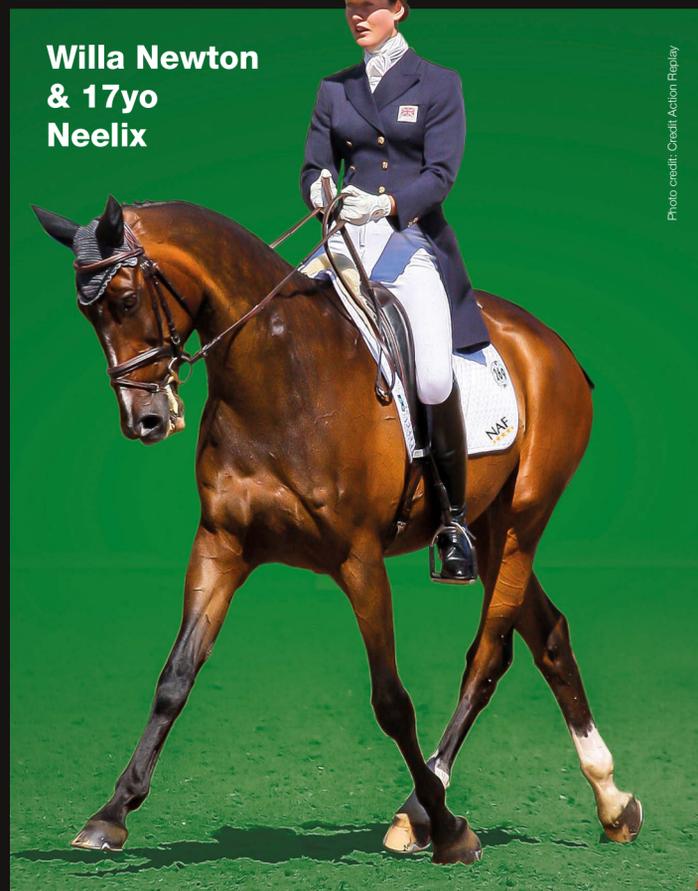

Winter can be a challenging time for the veteran horse owner – keeping and improving physical condition, helping their joints cope with being stabled for longer periods of time, supporting them with the cold and wet whilst keeping their feet in good condition are all areas of concern.

Five Star performers for your horse's ever changing fitness regime.

Five Star Superflex Senior

Willa Newton gives sound advice "I feed Neelix, my 17 year old wonder horse who has brought me right the way through from Pony Club to 4* Superflex Senior – It's a brilliant product. My older and more advanced horses have felt fantastic since being on it!"

Five Star treatment for healthy, flexible senior joints.

Five Star PROFEET

Mark Todd puts his best foot forward with PROFEET - "PROFEET ensures our horses have great feet... good, strong hoof growth with no cracks or splits. Plus, it keeps my farrier happy as he gets quality hooves to shoe. Between us, with the support of the PROFEET range, we believe we have hoof care sorted!"

Stamp out bad feet, nourish and protect with Five Star PROFEET.

Recover

Paul Tapner does the right thing "Recover is now a must for our horses during the competition season. They recover quicker from travelling abroad, or when we have competitions back to back. They bounce back better, ready for the next event, ready to perform"

Put back in what you have taken out.

In the Pink Senior

"Since feeding In The Pink Senior, Pollie not only feels very well in herself, she also looks in great condition. She is noticeably more active and enjoying life to the full!" **In the Pink Senior features Kathryn and veteran Irish Dancer III aka Pollie.** In the Pink Senior contains a digestibility enhancer, prebiotics, vitamins, minerals and herbal support of an alert and focused mind.

Feed In The Pink Senior and let your horse be an O.A.Performer!

Mpower

The older eventer brings all his years of experience to the job. They know just how to strut their stuff in the dressage arena, and which corners they can cut cross country – Feed Mpower to maintain muscle power and stamina in eventing horses of all ages so they have the muscle power to achieve the results they deserve.

The Future of Muscle Power

Grooming range

The trot up is your catwalk, make sure you stand out from the crowd with everything to clean, polish, shine, plait and perfect your horse.

Prepare to be magnificent.

Five Star Respirator Boost

Tom McEwen makes Five Star feeding a breeze "We feed Respirator Boost to all the horses whilst they are competing, especially at the bigger events. Eventing is an aerobic exercise, especially the cross country phase, so the more air that can get into the lungs, the more oxygen that can get to the working muscles. No airway, no horse."

Respirator Boost is the clearway to performance.
